<p>Detergent compsn. comprises 1H,6H-perfluorohexane (PFH). The detergent compsn. may contain more than 50% by wt. of PFH and opt. contain an organic solvent for dry cleaning, e.g., hydrocarbons, alcohols, ketones, ethers, esters and chlorinated hydrocarbons. The hydrocarbon includes n-pentane, 2-methylbutane, n-hexane, 2-methylpentane. Alcohols include methanol, ethanol, 1-propanol, 1-butanol, the ketones include acetone, MEK, 2-pentanone. The esters include methyl formate, ethyl formate, propyl formate, butyl formate. The chlorinated hydrocarbons include methylene chloride, 1,1-dichloroethane.</p> <p>USE/ADVANTAGE - The detergent compsn. has good dry cleaning properties and is used instead of R113(1,1,2-trichloro-1,2,2-trifluoroethane which has high decomposition of ozone layer. (3pp Dwg.No.0/0)</p>
